- Front-End Skills: React, Vue.JS
- Amazon Web Services
- Expert JavaScript

- Search Engine Optimization
- Web3 Token design
- Back-End and Database Skills
- SEO techniques
- Version Control Systems: Git, Github

WORK HISTORY

Senior Web Application Developer, 11/2021 – 03/2024

PayPay – Japan

- Developed custom features and functionalities to enhance the PayPay platform's capabilities, including real-time transaction processing, fraud detection algorithms, and integration with third-party payment gateways and financial services.

- Provided technical leadership and mentorship to a team of developers, guiding them in project planning, architecture design, and implementation, and fostering a culture of innovation, collaboration, and continuous improvement.
- Collaborated closely with product managers, designers, and cross-functional teams to define project requirements, prioritize features, and develop strategic solutions that align with business objectives and user needs.

Senior Web Developer, 08/2019 – 09/2021

BeetSoft – Japan

- Architected scalable and maintainable solutions using best practices and design patterns, optimizing performance, scalability, and security while minimizing technical debt and maintenance overhead.
- Developed custom features and functionalities to address specific client needs, such as real-time collaboration tools, interactive dashboards, and integration with third-party APIs and services.
- Implemented comprehensive testing strategies, including unit testing, integration testing, and end-to-end testing, using tools like Jest, Enzyme, and Cypress, to ensure code quality, reliability, and performance.

Senior Web Developer, 07/2017 – 05/2019

DataSoft NEXT Japan – Japan

- Spearheaded the development of complex and scalable web solutions for clients across diverse industries, employing advanced technologies and methodologies to meet business objectives and exceed client expectations.
- Provided technical leadership and guidance to a team of developers, overseeing project planning, architecture design, and code reviews to ensure adherence to best practices and maintain high code quality standards.
- Collaborated closely with clients to understand their business requirements, provide strategic recommendations, and translate them into technical specifications, ensuring alignment with project goals and objectives.
- Designed and implemented robust and scalable architectures for web applications, utilizing cutting-edge technologies such as React.js, Node.js, TypeScript, and GraphQL to deliver high-performance and maintainable solutions.

- Developed custom features and functionalities to address specific client needs, including integration with third-party APIs, implementation of advanced data processing algorithms, and optimization of application performance and scalability.

Junior Web Developer, 05/2015 – 02/2017

Rikkeisoft - Japan

- Led the development of innovative web solutions for clients across diverse industries, leveraging a full stack of technologies including HTML, CSS, JavaScript, React.js, Node.js, and MySQL.
- Designed and developed responsive and culturally appropriate user interfaces that enhance user engagement and drive conversions, following best practices in UI/UX design and accessibility standards.
- Collaborated closely with clients to understand their business objectives and translate them into functional requirements, ensuring alignment with their strategic goals and cultural preferences.
- Utilized Docker and Kubernetes for containerization and deployment orchestration, streamlining the deployment process and improving scalability, reliability, and maintainability.
- Created powerful Content Management Systems to serve as interface for client.
